"Dog loves this," "Great dog play," a tiny nois, but that is probably because the dog charges through it at the speed of light. The only down side is that both my 7 year old and 9 year old boys can climb through it, so we have to lock it when we go out. "Rugged and sensible - built to last". Unlike other catflaps purchased locally, the Ferflast Wing 7 actually lasts a lot longer, as I replaced the first one bought 8 years later. The flap system really resists to gales and other storm force winds and the one I installed in the kitchen faces the prevailing winds from the North Atlantic -

fit the previous cat flap which had disintegrated. Therefore as this was the same size (w x h) it was an automatic contender. The flap itself was easy to install - but make sure you 'register' your cats before doing so - it will prove almost impossible once in the door, although the collar supplied also works well. Installing was relatively easy once the instructions on how to cut the tunnel are wrong. The template provided which suggests to use the cuts to mark the lines around the tunnel is not intuitive. While it actually says that you must add 8mm to the measurement of the thickness of the door (X). The template indicates that for thickness Y use each corresponding side. It is wrong however because the template should have taken into account the additional 8mm but it doesn't. Needless to

^aVery loud clock clack when the dogs go through it. We bought this to replace one identical model that had done many years service. Replacing the old one was very easy - the only problem was the new screws were 10mm shorter than the old ones and I had to reuse the old ones. They have added an extra flap, probably as a safety measure. This extra flap gives a loud clack, clack when the dog runs. Neither does nor would use for this purpose as I found it effective for the old one and the dogs happily did it and now it has a flap that makes a loud clack when the dog goes through it.

"Great for small dogs, a bit strong for cats". I bought this as I have a small dog sized cat. He manages it OK but sometimes he's not so quick pulling his tail through and it gets a pinch. "Rubbish product" "Rubbish product, the design using a hard brittle plastic is madness. Having 2 young dogs regularly using the flap it was inevitable that one of the small lugs acting as the hinge would snap off sooner or later!!!! Also, the locking mechanism is also rubbish, it was suspicious of it working and low and behold the first time it failed to do what we were straight out into the garden!!!! That also then meant that after that it was every other time it failed to lock the locking bits up to unlock it correctly in both directions. Do not buy, a terrible product!!!! "Magnetic tag issue", "We tried this with our cat and it seems that the magnetic tag just doesn't get close enough to trigger the mechanism, even when he has his face right up to the flap. It works if we take the collar off and hold the magnet closer, just not when it's on him. The magnet tag is pretty bulky too and won't fit onto a standard barcollar away as the gaps aren't big enough to get the buckle or adjuster through, so you're stuck with the stretchy type (which isn't as safe). "It works great", "This cat flap has worked without fault, allowing our two cats to pass in and out, whilst barring other (previously troublesome) neighbourhood cats. Our own cats are now much more relaxed. It is very helpful to 'register' your own cats to the cat flap BEFORE fitting it to the wall - we placed the cat flap on the carpet, placed some cat treats inside and our cats soon approached, in turn, to allow registration of their microchips. The instructions are not very detailed - whilst the instructions do explain that the 'control panel' must be fitted inside the home (!), they aren't explicit that the attaching screws can only be screwed into this 'control panel' from the REAR. In our case, we were installing the cat flap in front of a tunnel through a cavity wall - so, for us, it was necessary to attach the cat flap to a wooden panel on the inside of the cavity wall so we could see the inside surface of our cavity wall so we did not have some minor challenges in installing the cat flap. But here's the 'bottom line': it works great!"5,"","",https://www.amazon.co.uk/gp/customer-reviews/R2UEK9VGQZ8P/ref=cm_cr_gtr_d_rvw_title=UTF8&ASIN=B00FRFSY8Y, "B00FRFSY8Y", "Colour Name: Blanc | Size Name: 22.5 x 16.2 x 25.2 cm. | Style Name: SWING MICROCHIP"

"Good choice, extra protection from draughts too", "Fantastic super large dog flap. This one replaced the same model which had served us well for 6 years before our dog ran into it full tilt carrying a yard broom and pulled the entire thing out of the wall! Still don't know how he managed to get partially through and come in leaving the entire thing but in removing it from him we broke the inner flap, so we decided a new one might be prudent. Well made, still in one piece after all that punishment so we would not have anything else."5,"","",https://www.amazon.co.uk/gp/customer-reviews/R2ARSU4T3WSRF/ref=cm_cr_gtr_d_rvw_title=UTF8&ASIN=B00FRFSY8Y, "B001MZYFCQ", "Colour Name: White | Size Name: 41.2 x 9.6 x 48.2 cm. "OK - Noisy when used, and locking mechanism can be broken.", "This flap has a double window mechanism to keep out the cold but it is REALLY loud when the dog use it. Our one lasted 6 months until we locked it to keep the dogs outside and they smashed through it, breaking the plexiglas plastic. Does what it says on the tin but its locking mechanism is ok for a cat, but a dog just has too much strength for it and can break it."3,"","",https://www.amazon.co.uk/gp/customer-reviews/R1A8G5H8C05C/ref=cm_cr_gtr_d_rvw_title=UTF8&ASIN=B00FRFSY8Y, "B000A270B6", "Colour Name: White | Size Name: 31 x 9.6 x 38.4 cm. "Do not buy", "I have bought 3 massive problems getting the cat flap to recognise the chip in a foil lined metal plate. Removed foil and lined with timber. Spaced 100mm off wall all to no avail. Freedom from Ferplas. The door completely failed in operation see photo. Instructions look like a direct translation from a 7 year old plastic moulding are of poor quality, all stickers have to be applied."1,"",<https://m.media-amazon.com/images/I/61tNgf0GL.jpg>,https://www.amazon.co.uk/gp/customer-reviews/R5R139G62PMTY/ref=cm_cr_gtr_d_rvw_title=UTF8&ASIN=B00FRFSY8Y, "B00FRFSY8Y", "Colour Name: Blanc | Size Name: 22.5 x 16.2 x 25.2 cm. | Style Name: SWING MICROCHIP"

"Great quality", "This is my 2nd one of these because the first one lasted about 8 years. The only problem is with vigorous use the wind stopper flap thing breaks off but I don't find that it detracts from the efficiency and efficacy of the dog flap. I have never used the 'in only' or the 'out only' feature as I need it to be permanently open and accessible, it is used all every day. Days that burger through will make a lot of noise with this unit."5,"","",https://www.amazon.co.uk/gp/customer-reviews/R3X0B3KX0Q7P/ref=cm_cr_gtr_d_rvw_title=UTF8&ASIN=B00FRFSY8Y, "B001N0097K", "Colour Name: Brown | Size Name: 41.2 x 9.6 x 48.2 cm. "Very noisy and the microchip scanner is faulty but can't remove it without replacing it first", "Very noisy when opening and closing. Not very big so one of my cats struggles to get in.
