"for an internal door only", "It does the job and comes with all the bits you need inc the tunnel. easy to put together if the instructions are a bit confusing its common sense anyway cutting the hole in the door and putting it in. sturdy. not very good for an external door though the lock is on one side and the screws holding it together to the door on the other so for external door theyd be on the outside. guess a burglar couldnt get through unless he was tiny but its not very good piece of mind that." 4 " " " " "https://www.amazon.co.uk/gp/customer-

"Great for the money!", I bought this as my little American Cocker spaniel Millie would stare longingly out of the cat flap (head stuck out). As she's reaching that tain age of 11 she can't always hold it in whilst I'm at work. We bought this thinking it was magnetic as we have a stray cat who thinks he owns the joint and he's always trying to get in all the time to spray his wonderful pet smelling perfume around the house. We've named him Dennis..... cos he's a menace. My husband dragged the door into the garage cut a bigger hole and easily fitted the new dog/cat flap. Put the door back on it's hinges and we both stared at each other thinking the other had the magnets for the collars. Then started thinking what cheapskates not giving us magnets, then the icy dread of realising that IT ISN'T MAGNETIC OMG WHAT ABOUT DENNIS. Too late and it's in now, non magnetic. However, it's obvious to us now that Dennis will not be a member of

"Ferplast Swing 3 Cat Door","Bought this to install in a new double glazed door. Had the glass cut as directed to 216mm diameter. However when we fitted the flap it did not cover the seal thickness within the hole diameter of the double glazing, so the hole was visible outside the flap. This was completely unacceptable and the manufacturer would not accept that they were at fault, despite sending photographs of the installed flap and of the glass hole with a tape measure across it showing the diameter was cut correctly. A very costly mistake buying this flap! Once installed it can't easily be replaced of course, as every flap has differing dimensions. Glass cost Â£165 and we had to ""adapt"" an adapter plate for another flap make, to cover the hole perimeter, but this was not entirely successful, so we are now stuck with a not so smart cat flap. Beware if installing in glass, there is no room for error and this manufacturer doesn't care that they give inadequate information or take responsibility. Would NOT recommend this flap for installation in glass. "The purrfect cat flap for enormous cats!", "We needed a larger cat door, as our Maine Coon, who is nearly 10 kgs and still growing, looked as though he might get stuck in the old one. It works brilliantly for him. The other cats weren't keen at first as they have to push it harder than a normal sized cat door and it makes a lot of noise, but they seem OK with it now. "Changes the game for housebreaking", "The media could not be loaded. Æ Overall happy. Paid almost Â£300 for a professional glazier to put this in our glass patio door. Fierce winds will cause the flap to blow open but itâ€™s not a frequent issue. A bit worried about winter though! We have had the flap since March so I canâ€™t say anything about freezing cold drafts (âœƒedraughtsâœƒ (UK)). We are in Brighton UK where it gets windy. Our dog is six months old in the photos and video, Iâ€™m pretty sure it will accommodate her when full grown. It gives a loud SMACK noise when opening and closing. "No more unexpected visitors.", "Over many years of keeping (?being kept by?) cats we found another cat in the kitchen. Although we chased it out it kept returning, and the final strw was finding it in the bedroom in the middle of the night. Our existing cat flap was a Ferplast one, which itself had been hard to find as it had to fit the previous cat flap which had disintegrated. Therefore as this was the same size (w x h) it was an automatic contender.The flap itself was easy to install - but make sure you 'register' your cats before doing so - it will prove almost impossible once in the door, although the collar supplied also works well. The only problems we have encountered are that the tunnel is slightly longer than on the previous one, so protrudes slightly from the door, and the little indicator device which shows which way the last user travelled (Out or In) sometimes sticks in the half way position. This appears to be something to do with the lip at the end of the tunnel, which wasn't on the original manual version.However, overall it does the trick. We have had no more visits from unwanted cats, nocturnal or otherwise!",4,"-","-", "https://www.amazon.co.uk/gp/customer-reviews/R2TRP1FWG7MGL/ref=cm\_cr\_getr\_d\_rvw\_ttl?ie=UTF8&ASIN=B00FRFS8Y8","B00FRFS8SE","Colour Name: Brown | Size Name: 22.5 x 16.2 x 25.2 cm. "... around instead of just the two sides and worked like a charm for about 8 long years","Had an earlier model of this unit which had a magnetic seal all around instead of just the two sides and worked like a charm for about 8 long years. Then the magnetic seal on the flap broke off and would not stay shut. So ordered the same model but now the design has changed and the magnet for keeping it shut is just on the sides making it a weaker hold and more prone to open with wind.Installing was relatively easy though the instructions on how to cut the tunnel are wrong. The template provided which suggests to use the cuts to mark the lines around the tunnel is not intuitive. While it actually says that you must add 8mm to the measurement of the thickness of the door (Y), the template indicates that for thickness Y use each corresponding side. It is wrong however because the template should have taken into account the additional 8 mm but it doesn't. Needless to say that I ended up with a tunnel a bit shorter than it should have been for a perfect fit.As a flap, yes it is a bit noisy but I do hope that it will last as long as the first one did. Two small dogs and a cat use it and they very easily learned how to.",3,"-","-", "https://www.amazon.co.uk/gp/customer-reviews/R2O87B3R3CF5H4/ref=cm\_cr\_getr\_d\_rvw\_ttl?ie=UTF8&ASIN=B00FRFS8Y8","B000A270B6","Colour Name: White | Size Name: 31 x 9.6 x 38.4 cm. "Looked good, worked well but flap broke in few months","This is a good solid, sturdy cat flap which my cats took to quickly. The controls are easy to operate, although I am just hoping that my little 'Houdini' doesn't work out how to turn the knob, as it turns easily and he is a clever lad who worked out how to open doors by pulling the handle down!! like the fact that it makes a noise when the cats use it, as it lets me know when one has come in or out - either one of mine or a non-resident on the scrounge!Added about 4 months later:Houdini has not been able to turn the knob, but the flap bit was broken this morning, presumably during an altercation between Houdini and a very aggressive new cat on the block. A top corner has been broken off.I have had to replace the flap with a spare one I had (another brand) for the time being. I saw that my builder had used sealant around the edges, and thought that he was just being extra-thorough, but he seems to have made a bit of a mess of putting the screws in, and maybe there was also a problem with the design as referred to by another reviewer, leading to a gap around the edges, hence the sealant?!m hesitating over buying another one of these. es","-","Magnetic tag issues","We tried this with our cat and it seems that the magnetic tag just doesn't get close enough to trigger the mechanism, even when he has his face right up to the flap. It works if we take the collar off and hold the magnet closer, just not when it's on him. The magnet tag is pretty bulky too and won't fit onto a standard breakaway collar as the gaps aren't big enough to get the buckle or adjuster through, so you're stuck with the stretchy type provided (which isn't as safe). The plastic of the cat flap construction is also a bit cheap and cheerful.",2,"-","-","https://www.amazon.co.uk/gp/customer-reviews/R3531W9L4PMP9F/ref=cm\_cr\_getr\_d\_rvw\_ttl?ie=UTF8&ASIN=B00FRFS8Y8","B000A270AM","Colour Name: White | Size Name: 22.5 x 10.4 x 25.2 cm. es","-","It works great","This cat flap has worked without fault, allowing our two cats to pass in and out, whilst barring other (previously troublesome) neighbourhood cats. Our own cats are now much more relaxed. It is very helpful to 'register' your own cats with the cat flap BEFORE fitting it to the wall - we placed the cat flap on the carpet, placed some cat treats inside and our cats soon approached, in turn, to allow registration of their microchips. The instructions are not very detailed : whilst the instructions do explain that the 'control panel' must be fitted INSIDE the home (!), they aren't explicit that the attaching screws can only be screwed into this 'control panel' from the REAR. In our case, we were installing the cat flap in front of a tunnel through a cavity wall - so, for us, it was necessary to attach the cat flap to a wooden panel which we were then able to screw to the inside surface of our cavity wall. So, we did experience some minor challenges in installing the cat flap. But here's the 'bottom line' : it works great !",5,"-","-","https://www.amazon.co.uk/gp/customer-reviews/R2JUEK09VGQF2R/ref=cm\_cr\_getr\_d\_rvw\_ttl?ie=UTF8&ASIN=B00FRFS8Y8","B00FRFS8Y8","Colour Name: Blanc | Size Name: 22.5 x 16.2 x 25.2 cm. | Style Name: SWING MICROCHIP"
